### **7.3 Institutional Distinctiveness**

To get higher education was one of the most difficult task in the village around 1990. Dnyaneshwar Gramonnati Mandal, Ale has started this college in 1994, so that students from rural areas should not be deprived of education. Initially the art and commerce unit was started. In view of response of students and parents to this college, the science unit was started in 1994.

Even today, the number of girls learning in our college is high. We sincerely wish higher education for all. On our part we are committed to provide quality in every aspect in the process of imparting education. Our focus is to create students who are well-equipped to meet the challenges of the global environment. Global environment is rapidly evolving and thus students have to learn not only the existing principles and situations but also to develop themselves as creative and critical thinkers. For that purpose, the organization started the BCA in 2008, MCA in 2010 and B.Sc.(Computer Science) from 2014. All departments of college help in increasing co-curricular and extra-curricular activities of students. College has a placement cell to assist the students in securing good job offers even before the final results. Apart from this most of the girls and boys of Arts, Commerce and Science faculty after competing their graduation, stop learning because of no nearby college available for post graduation. To overcome this problem institute has started M.A (Marathi) and M.Com. Institute is planning to start M.Sc in

physics and chemistry in next academic year. It is our endeavor to keep pace with the needs of the industry.

The Alumni of the college have done exceedingly well in all spheres of life at both national and international level and brought name and fame for themselves. Alumni of every faculty always guide the fresher's to get the good Job. They take this as a part of their responsibility and maintain the healthy atmosphere of development among them. The College takes pride in their achievements. Our college started its corporate life with handful of students, limited faculty, little property, but a determined mission of imparting higher education and keeping cultural heritage intact. It is our collective efforts that make this college such a vibrant place to learn, to work, and to explore. Students choose our college for many reasons: the reputation of our faculty, the quality of our academic programs, the individual attention they will receive from faculty and staff, and the wealth of campus activity. As well as we will strive to create a learning environment where our students are able to acquire knowledge and advanced skills in their specialized fields enabling them to fulfill their aspirations.
